- 🌐 norbek2003.github.io
- 📍 New York, NY

Hard working, experienced, and results-driven full stack software developer with 2+ years of experience in the field. Experienced in working with a team to achieve strict goals and return results in a timely, efficient fashion. Dedicated to improving company performance and providing management with efficient tools for running the company. High level of proficiency in Javascript, Python, PHP, and Java. Quick study in new languages and frameworks.

WORK EXPERIENCES

Full Stack Software Developer

Yabla | 2019 - Present

Compile and visualize statistical data for the company's financial and administrative departments. Design administrative software to improve management of the service's members and business affiliates. Spearhead new projects and features for the users. Create classes and scripts on the back-end to control and manipulate data. Design pages and processes to encourage and ensure healthy habitual use among customers.

Head Of IT

Redefy Stuyvesant | 2019 - 2020

Volunteer work creating and maintaining a website for the local chapter of *Redefy*, a student led activist community committed to promoting acceptance, defying stereotypes, and defeating hate through investigative journalism, providing resources, and generating community discussions. Worked closely with the group's leadership to meet their needs completely.

Computer Science Tutor

CSDojo | 2019 - 2020

Tutored students, helping them learn effective problem-solving and debugging techniques using Python, Netlogo, Lisp, and Java. Mentored youth in the correct applications and implementations of data structures and algorithms.

Full Stack Software Developer

Stuyvesant Student Union | 2017 - 2019

Designed software for the Union as a member of the IT department. Initiated and spearheaded the development of an escalator monitoring system using own proprietary software and kiosks throughout the campus, making for efficient travel inside the large multi-storied complex.

EDUCATION

Hunter College - City University Of New York

345 Chambers St, New York, NY

Fellow of the renowned Daedalus program, the competitive full scholarship and esteemed computer science program tied to NYC's thriving Tech Industry.

Stuyvesant High School

695 Park Ave, New York, NY

Graduated one year early from Stuyvesant High School, one of the US's most renowned public schools. Majored in Computer Science, basing my program around it and taking accelerated courses in the field including but not limited to Artificial Intelligence, System Level Programming, and Computer Graphics.
